THE BOSTON SHAKER

This tool consists of 2 pieces: a mixing tin (or shaker) and a mixing glass. We shake cocktails to make sure that the drink is both cold and thoroughly mixed. To use the Boston Shaker, prepare your cocktail in the mixing glass and then place the shaking tin over it and create a seal by tapping the top. Then flip the shaker upside down and shake vigorously with both hands. Firmly tap the side of the shaker to release the seal. This is when you would place the Hawthorne strainer over the tin to strain your drink.

THE HAWTHORN STRAINER

The most popular kind of strainer and also part of the Boston Shaker set. To use, place strainer on top of the shaker tin and put your forefinger and middle finger on top of the strainer with your other fingers grabbing the shaker. Holding tightly, strain the liquids into your glass, but remember to keep it sexy my friends!

COCKTAIL SPOON

This long handled teaspoon is used for stirring your drinks and for layering on top of other liquids. To stir properly, hold the twisted part of spoon between your thumb and first two fingers.

Plunge the spoon into the glass, twirl the spoon using your fingers while moving the spoon up and down in the glass for about thirty seconds. I know it sounds complicated, but it really isn't!

SPEEDY BOTTLE OPENER

You won't be needing this guy for any of the recipes in this book, but hey, your very own Tippy Bartender bottle opener! Just place the top of your bottle inside the tooth-end of the

bottle opener, hook the bottom of your bottle cap on top of the tooth and pull up! You can slide this little guy in your back pocket and pop open beers in one quick move!

POUR SPOUTS

Every bartender needs these! There are four (4) black cork-and-chrome pour spouts in your box. Top your liquor bottles with these, they provide a thin, constant stream of liquid for easier and more exact pouring.

JIGGERS

In your box you got 3 stainless steel double jiggers, a 1/2 - 1 oz., 3/4 - 1 1/2 oz., and a 1 - 2 oz. These jiggers are essential and necessary for making precise measurements to make drinks correctly. All you gotta do is fill the proper side of the jigger with the appropriate liquor and pour into your drinking glass!

TIPS TO KNOW

- If your drink gets ice, put the ice in before liquid.
- Liquor always goes in before mixers!
- Grenadine always goes in last! It's density forces it to sink to the bottom for a cool, sexy look!
- You will always have some leftover drink in your shaker tin, you didn't make it wrong—drink it up!

ADD ICE TO YOUR GLASS.

DROP IN A CHERRY.

HOW TO READ THE DIAGRAMS

When looking at the diagrams in this book, it get a little confusing. Just remember, liquor goes in first! The color coded list of ingredients starts with the ingredient you put in first, down to the ingredient you put in last. Refer to the example below for better understanding.

SHOTS

When you think of shots, you think of pain and punishment, something you have to get psyched up to do, and something you don't want to do when you have to work the next day. When guys do shots, they huddle together for a pep talk: "We can do this! No one gets left behind!" None of these shots require you to get psyched first—there are no burning chests, runny noses, or watery eyes that follow taking any of these shots. Everything here will go down smoothly. Enough talk, let's take some shots!

BLUE KAMIKAZE

- ¼ oz VODKA
- ¼ oz BLUE CURACAO
- ¼ oz SIMPLE SYRUP
- ¼ oz LIME JUICE

Shake the ingredients with ice and strain into a shot glass. Garnish with a lime wheel.

What is simple syrup? Sugar and water—that's it! To make it, combine 1 cup of sugar and 1 cup of water in a saucepan and bring to a boil and *vióla!* Simple syrup.

WHITE GUMMY BEAR

- ¼ oz RASPBERRY VODKA
- ¼ oz PEACH SCHNAPPS
- ¼ oz PINEAPPLE JUICE
- ¼ oz SPRITE

Shake ingredients with ice and strain into a shot glass, and if you want, add a white gummy bear!

The gummy bear garnish really sells this shot. When you see it, you immediately have to try it. How can you say no to a gummy bear sitting on your glass smiling at you?

You can find more ideas like these on our YouTube video blog, www.YouTube.com/TipsyBartender. Now lets get this party started!

VODKA GUMMY BEARS

6 LB BAG OF GUMMY BEARS

½ oz ORANGE VODKA

¼ oz TRIPLE SEC

¼ oz LIME JUICE

Dump out all the gummy bears in a large container.

Add the alcohol to the bowl and stir so that all the gummy bears are submerged in alcohol. Cover the container and refrigerate for 24 hours.

JUNGLE JUICE

2 BOTTLES BACARDI 151	2 WATERMELONS
2 BOTTLES EVERCLEAR	5 PINEAPPLES
2 BOTTLES GIN	10 ORANGES
6 BOTTLES VODKA	40 STRAWBERRIES
2 BOTTLES BLUE CURACAO	10 APPLES
1 BOTTLE 99 GRAPES	8 LITERS SPRITE
1 BOTTLE 99 APPLE	8 LITERS HAWAIIAN PUNCH
2 BOTTLES COCONUT RUM	8 LITERS ORANGE SODA
2 BOTTLES SOUR APPLE PUCKER	8 LITERS ORANGE JUICE
2 BOTTLES PEACH SCHNAPPS	HANDFUL OF MINT LEAVES
8 BOTTLES WILD VINE STRAWBERRY	

Slice all the fruit and toss into a 30 gallon tub or other container. Add all the liquor, then the juices and soda last. Stir well and serve. This makes 19 gallons of jungle juice and will keep the party going all night long!

30 bottles + 67 fruits + 32 juices!

MARGARITA JELLO SHOTS

12 LIMES

1 CUP LIMEADE

2 GELATIN PACKETS

1 TBSP SALT

3/4 CUP TEQUILA

2 TBSP TRIPLE SEC

1 TBSP LIME JUICE

Cut limes in half and scoop out the insides and set aside. Now heat the limeade and gelatin over low heat until the gelatin has dissolved, and stir in the tequila, triple sec, and lime juice.

Once your mixture cools, pour it into the lime halves you cut earlier and refrigerate until set, which usually will take about 4 hours. If the lime halves roll around, set them in a container or put something around them so they don't move.

When the jello is set, cut the limes halves into 2-3 slices, sprinkle with salt, and serve.

WATERMELON KEG

1 LARGE WATERMELON

1 SPIGOT

1 BOTTLE WHITE RUM

½ BOTTLE COCONUT RUM

½ BOTTLE SOUR APPLE PUCKER

1 BOTTLE SWEET & SOURS MIX

8 oz PINEAPPLE JUICE

Using a knife, shave the bottom of the watermelon so it is able to stand up on its own. Cut off the top of the watermelon and remove all the flesh inside and place in a large bowl. With a drill or a carving knife, carve a small hole towards the bottom of the watermelon and fill it with your spigot. Squeeze all the juice from the watermelon flesh and dump into the watermelon. Now pour the rest of the alcohol into the watermelon and place the top of the watermelon back onto it as a lid. Place your cup under the spigot and drink away!
